

Government Property in Action

Everyone is an agent.

What is Government Property?

- “all property owned or leased by the government...[and] includes both Government-furnished property and contractor-acquired property.”
 - Real Property
 - Equipment
 - Special Tooling
 - Special Test Equipment
 - Repairables
 - Material

The list is incomplete. What's missing?

Over a year ago, in July, 2022, I already posted about you owned by the government:

You Are an Asset, Owned and Robbed Blind

Kissinger on Control Nobody seems to emphasize that the Federal Reserve is a private bank with the exclusive right to issue USD since 1913. The money is issued as a “loan” to the taxpayers with an interest, while the money is distributed among friends and family.

Not much later, in last September, I pointed out that [compliance-training started over a hundred years ago](#), and if you think about the people in Hawaii, who obeyed the police and turned back to their deaths, obedience is mortally efficient. The muzzle, of course, provided the last batch of the conditioning process:

Who Wudda Thunk?

RAY HORVATH, "THE SOURCE" :) · SEPTEMBER 1, 2022

The humiliation and torture device, the muzzle, contained a couple of carcinogens as well as some graphenes. It created a Petri dish out of the wearer's exhalation, resulting in sickness that came with "covid" symptoms. When the victims of the 1918 "pandemic" were exhumed for the purpose of determining their causes of death, it turned out 95% of them we...

The story doesn't end there; the above proceedings were only previous parts of the process.

Agenda 2030 clearly goes for total control of everything and everyone, transforming them into parts of the IoT. When it comes to people, the CBDC is the final nail in the coffin of the people's imaginary freedom, in which they used to believe, when they were kept on a longer leash:

The Final Stage to a "One-World Government" Is Here: A Synchronized Introduction of CBDCs Worldwide

For the CBDC, which has already been introduced in banking in the US as the “FedNow,” people must be digitalized, for which there are a number of options, but “Digital IDs” are the end results, no matter what the medium is.

Digital IDs introduced in both red and blue states

Some people are still talking about left and right in the uniparty system of the US of A, a country that was hijacked already in 1913 with the Federal Reserve Act and the establishment of the IRS.

Executive order 13603 from 2012 is baring the teeth of the government

Presidential executive orders become law, unless they are nixed by Congress or by higher courts, which is unlikely to happen in this case. The following article gives you more details:

<https://www.thesurvivalistblog.net/executive-order-13603-and-what-it-means-to-preppers/>

The current problem, according to the author, is the following:

So, what's the issue with EO 13603 signed by Obama in 2012? Why was there so much controversy over it? In many cases, it's the language of executive order 13603 that created the most controversy. The language in the executive order encompasses control over a broad range of resources including:

- “(1) all commodities and products capable of being ingested by either beings or animals*
- (2) all forms of civil transportation*
- (3) all forms of energy*
- (4) all usable water from all sources*
- (5) health resources*
- (6) military conscription”*

If you have reserves, they can be taken by force

My first thought about that is that it's probably the enforcers, authorized by "law," who are the most likely to steal from you, and their confiscation will not be limited to "hoarded supplies." Practically, if you own anything, it can be taken from you, "for the public good," of course, whatever that means beyond your being a clog in the machine in which "you will own nothing." Well, you already don't, because the whole country, including your assets and life and limbs, has been used by your illegitimate governments as collateral for "loans" (fiat money conjured up out of nothing in the form of taxpayer debt) that politicians ¹ are so eager to spend lavishly on stuff that you would never need, like foreign wars and "helping Ukraine," mostly in order to accelerate the dollar's demise and, perhaps, to initiate [WW3 on TV](#).

What can you do in your protection? ² You must decide. In the meanwhile, rules, are rules:

The proceedings are well beyond the point of no return. Previously, I showed what is *not* going to work:

<https://rayhorvaththesource.substack.com/p/do-not-comply-no-kidding>

A number of things might work for you, depending on your circumstances, but beyond offering a discussion on the topic ³, I'm not going to give them away to the enforcers

who are also reading this.

- 1 <https://rayhorvaththesource.substack.com/p/hijacked-governments>
- 2 Theoretically, eminent domain or homestead can be claimed on your property, but homestead is granted only above a certain age (usually 65), and the right to eminent domain is usurped by the government.
- 3 For example, options have been explored in the comment section of

Here is a simple thing that anyone can do:

hydrogels/graphene, the jury is still out, especially because there are too many bottom-feeders, selling miracle cures:

Amaterasu Solar Amaterasu's Analysis Aug 30, 2023

...

My grasp is that Ones who have corrected Their status from debtor to creditor are no longer "owned." Once One is a secured party/creditor, They only have jurisdiction over the ALL CAPS name, which is a TRUST, and Your flesh and blood are Your own.

A friend of Mine, who corrects People's status for a living (US and maybe Canada only) corrected Mine as a gift. (No way, in My destitute state would I have had the \$1,500 He charges!) I wrote an article about one encounter with the costumed bullies here (They leave Me alone now after one more encounter which I may write up also):

It seems as if everyone has already long been tagged with a digital ID. It seems we've been nodes on the WBAN(wide body area network) for a very long time. While the presentation is rough, the information is rougher, especially if your mind has not been opened yet.
